QVM Bulletin: Q-220R1

Date: 12 March, 2014

Revised: 31 March, 2017

2015 MY Coolant Change from G05 to OAT

Revision	Update	Revision Date
Q-220R1	<ul style="list-style-type: none">• Added G05 coolant color• Corrected Ford Part Name.• Removed reference to equivalent coolant• Added reference to Bulletin Q-247	31 March, 2017

Models Affected: 2015MY F53/59 Stripped-Chassis
2015MY Transit (all models)

Description:

Ford Motor Company production of motorhome recreational (F53) and step van commercial (F59) stripped-chassis vehicles will be changing its current engine coolant formulation from G05 (GOLD color) to OAT (ORANGE color) starting 2015MY Job #1 (8/11/14).

All North American 2015MY Transit vehicles will also be utilizing the OAT coolant formulation.

Ford recommends that the builders review with their suppliers the coolant containing components that they add or install for compatibility with the new coolant.

NOTE: OAT and G05 coolants CANNOT be mixed

The new coolant formulation will be the same as that used on all other North American manufactured vehicles **except E-Series** (built prior to 2017MY - refer to latest revision of SVE Bulletin Q-247).

The Owner's Guide will specify this new coolant as follows:

- Ford part name or equivalent: Motorcraft Orange Prediluted Antifreeze/Coolant
- Ford part number: VC-3DIL-B (US), CVC-3DIL-B (Canada)
