2013 Sedan & Utility Police Interceptors Part Numbers for Addition of Front Lighting Package

Models Affected

2013 Sedan & Utility Interceptors not originally ordered with the Front Lighting Package (Sedan Option 661 & Utility Option 66A) beginning Job #1 2013MY.

Purpose

This bulletin provides part numbers for components that make up the Front Lighting Package for the Sedan Interceptor (Option 661) and Utility Interceptor (66A).

See Police Modifier Bulletin P-006 for wiring direction if the complete OEM harness was not originally ordered with the vehicle.

⚠ WARNING: Before beginning any service procedure in this section, REFER to [Safety Warnings](#) regarding materials/chemical, containers/instructions, and with tools are implemented when working on vehicles. Disconnect the vehicle battery prior to beginning electrical work. Failure to follow this instruction may result in serious personal injury.

Ensure Safety Warnings for all interfacing components/systems encountered or possibly affected are reviewed.

Ford does not recommend using the projector beam headlamp high/low bulbs in the 2013 Police Interceptor for wig-wag function. Wig-wag function will reduce the designed life of the headlamp. However, the Ready-for-the-Road Package and Front Lighting Package contains a dedicated LED lamp with white light to provide wig-wag function and also amber LED lights for turn signal and park in park functions.

<i>Police Interceptor - SEDAN</i>
