⁽¹⁾ Load rating represents maximum allowable weight of people, cargo and body equipment and is reduced by optional equipment weight.

NOTE: Refer to Standard Equipment for Standard Powertrain/Chassis Equipment Specifications.

⁽²⁾ Gross axle weight rating is determined by the rated capacity of the minimum component of the axle system (axle, springs, wheels, tires) of a specific vehicle. Front and rear GAWRs will, in all cases, sum to a number equal to or greater than the GVWR for the particular vehicle. Maximum loaded vehicle (including passengers, equipment and payload) cannot exceed the GVW rating or GAWR (front or rear).

⁽³⁾ Base Curb Weights shown above consider the strip chassis weight with standard equipment, full fuel tank and all other fluids filled to capacity. Optional equipment weights are in pounds as follows: (Front/Total): 19.5" x 6.75" Tires and Wheels (available with 22,000-lb. GVWR only) (-39/-76); Track Bar Heavy-Duty Front Suspension (available with 16,000-lb. GVWR only) (32/32).

⁽⁴⁾ Available FGAWR 7500 lbs.
